

NEVE.

1658.

A New Almanack and Prognostication,
serving for the yeare of our Lord
God and Saviour Jesus Christ; 1658.

Being the second year after the Bissextile
or Leap-year.

Wherein is contained a double Kalender
viz. the *Julian* or English Accompt, and
the *Gregorian* and Forraigne Computation,
with the Change of the Moone, her
Full and Quarters, and time of
the Eclipses: and other ne-
cessary observations, conve-
nient to be noted.

Calculated, and exactly rectified, for
the Elevation of the Pole Articke, and
Meridian of the ancient and famous City
of *Norwich*, and may serve generally
for the most part of great
BRITAIN.

Practised, penned, and published,
by IOHN NEVE Gent.

Annually continued by the Author, and the
fifty eighth time Imprinted

LONDON.

Printed by S.I. for the Company
of STATIONERS.

The Contents of this double Kalender for this year
of our Lord God 1658. being the second after
the Bissextile or Leap-year, according
to the Accompt and Computation

The Prime or Golden Number.

The Circle of the Sun.

The Anatomy of Mans Body, as the parts
thereof are governed by the twelve
Cœlestiall Signes of the
Zodiacke.

♈ Aries, Head and face.

♉ Taurus,
Neck and
throat.

♊ Gemini,
Breast, stomach,
and ribs.

♋ Cancer,
Bowels and
Belly.

♌ Leo,
Secret members

♍ Virgo,
The knees.

♎ Gemini,
Armes and
Shoulders.

♏ Leo,
Heart and
back.

♐ Libra,
Knees and
Legs.

♑ Sagittarius,
The Thighs

♒ Aquarius,
The Legs.

♓ Pisces, The feet.

The Characters of the Signes, Planets
and Aspects.

♈ Aries, ♉ Taurus, ♊ Gemini, ♋ Cancer, ♌ Leo,
♍ Virgo, ♎ Libra, ♏ Scorpio, ♐ Sagittarius, ♑ Capri-
cornus, ♒ Aquarius, ♓ Pisces, ♄ Saturne, ♃ Jupiter,
♂ Mars, ☉ Sol, ♀ Venus, ☿ Mercury, ☾ Luna. ♂ Con-
junction, ✳ Sextile, ☐ Quartile, ☐ Trine, ☐ Oppol-
ion, ♁ Caput Draconis, ♂ Cauda Draconis.

January hath xxxi dayes.

If thou be sick and help wouldst have,
The counsell of the Learned crave:
If thou have health, to keepe thee so,
Flie idlenesse as deadly foe.

NEVE. 1658.

A PROGNOSTICATION,
Serving for the yeare of our
Lord God and Saviour

JESVS CHRIST

1658.

Wherein you may observe the
grounds of the alteration and condition of the Foure Quarters of this yeare: As also the disposition of the Aire, for each severall Moneth, according to the inclination of the Cœlestiall bodies, with the charge of the Moone, her full, and Quarters, and the time of the Eclipses, with other things fit to be known and observed,

Calculated, and especially referred to the Longitude and Elevation of the Pole Artick, of the ancient and famous City of *Norwich*, and may serve generally for all ENGLAND.

Collected, composed and published by *John Neve Gent.*

The 58. Edition by the Author.

Printed at London by *W. Wilson* for the
Company of Stationers. 1658:

NEVE. 1658.

Of all the Eclipses which shall
happen this present yeare of our
Lord God 1658. according to the
Excellent observations of that noble *Tycho*
Brahe, and others well learned and
practised in that famous Art of
Astronomie.

There may be seene and obserued, unto the severall
Inhabitants, upon this our Terrestiall Orbe, two
great Eclipses of the Sun only, and not any of the
Moon (if the weather prove faire and cleare) but
because they accidentally happen under our Horizon,
they shall not present the losse of their light unto us
here in England, but in other remote places, as by
the relation following shall further be manifested, and
observed.

Of the first Eclipse of the Sun.

The first Eclipse of the bright Globe of the Sun,
which is the eye of the world, and the fountaine of
light, shall suffer a great Eclipse upon the 12. day of
May, being Saturday, in this our Julian yeare, a-
bout three of the clock in the morning, it shall be very
conspicuous unto those that dwell towards or in the
orientall parts from us here in England, in or about
the longitude of 156. deg. and 53. min. and also in the
17. deg. of north Latitude, which belong unto those
people that dwell in part of the East Indies and Ben-
gala, and the Ilands Philipines, and Cherson-
nesus, &c both the lights being then conjoined in the
east face of Gemini, not far from Capta Draconis,
in a signe of the Aerie Triplicity, naturally hot and
dry, of complexion sanguine, accidentall, common,
and Masculine, diurnall, governour of the armes and
banners, the day house of Mercurie, and the detri-
ment of Jupiter: The deg. eclipsed will be 11. and 52
min. and 25. seconds. The time of the incidence, shall
be one houre 16. min. and 46. seconds, and the whole
time of the continuance of this obscurity of the Sun,
from

A Prognostication.

from the beginning to the end thereof, is like to be
houres 33. men. 32. seconds unto the people before
pressed.

Of the second Eclipse of the Sun.

The latter and great Eclipse of the Sun, shall
sibly and visibly appeare upon the 14. day of
bember, being Sunday about 11 of the clock at night
according to our English computation, unto the peo-
ple that dwell beyond the equinoctiall line, in the
Islands of the occintall Ocean, and also in the Island
of De los Tubarones, and De los Hongos,
whose longitude is about 208. degrees, and also in
South Latitude of 17. deg. This Eclipse is removed from
our Meridian towards the West 11. houres and
min. The points of deg. eclipsed shall be 12. The
time of the incidence will be one houre 44. min.
the totall time of duration shall be three houres
29 min. and 50 seconds.

The great conjunctions of great Starrs.

The Eclipse of Sun and Moon :

Doth threat great death, great Deareh and wars.

If we repent not soon,

Now God above, and wrath above,

And Heaven above relent:

And man beneath, and sin beneath

And Earth beneath Repent :

Som

Some briefe Rules for Husban-
dry and Gardening.

The best time to sow all kind of corne, is when the Moone is in Cancer.

The best time to plant and graft, is in the increase of the Moone, she being in Taurus, Virgo, or Capricornus.

Remove and set young trees from October till February, in the first quarter of the Moone, shee being in Taurus or Capricornus.

Crop trees and fell wood, that the stock may the better and sooner grow again, when the Moone is in the first quarter.

Fell timber in December and Ianuary, in the old of the Moone is best: but if you would have it grow again, cut it down in the new of the Moone.

The best time to cut Vines, is in the end of Ianuary, in February, and in the beginning of March, the Moone increasing in Taurus, Virgo or Capricornus.

Cut hedges between the change and full, from the end of Ianuary, till the beginning of Iune.

Set and sow all kind of seeds, the moon being in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But the seeds whose roots be round, must be sowne three or four daies before or after the full moon.

Gather all manner of fruits, near the full Moone, in a dry time, gather flowers, and seeds for store, at the full of the Moone.

Seld cattell, the Moone being in Aries, Sagittarius, or Capricornus: Sheare sheep, cut hair that it may the sooner grow again: the Moone increasing, that is from the change to the full.

To much your land that weeds may not abound, is best in the last quarter of the Moone.

A fit time to kill fat swine is in the increase, nigh the

A Prognostication

the full of the Moon, the lard will the better endure the boyling.

Destro wennes, warts, and Cornes &c. in the last quarter of the Moon.

Brief Rules and necessary Observations concerning Bleeding, Bathing, Purging, and sweating, according to the motions of the Moon.

Of bleeding.

When the weather is extreame hot or cold, it is not then convenient either to let blood or purge, unless some great necessity require it: yet notwithstanding if this blood-letting be for the Phlegme, the Apoplexie, for a continuall headach, proceeding of Choler or blood, or any hot burning fever, or other extreame pain, a man in such a cause, may stay for a chosen time, because the patient might miscarry in the mean season, but in this aforelaid casual extremity, blood is not to be let in such a quantity as otherwile it would, if a chosen time might be conveniently expected.

The best time to let the Phlegmatick blood, is when the moon is in Aries, or Sagitarus, the head and thighs excepted.

For melancholy, the moon being in Libra, or Aquarius, the buttocks and legges excepted.

For the Cholerick, the moon being in Cancer, Scorpio, or Pisces, the breast and feet excepted.

For the Sanguine, all be good which before is named.

In the Spring time let blood at the right side.

In Harvest time, let blood on the left side.

NEVE 1658.
Of Bathing.

Bathing is commonly used rather for pleasure than for profit, especially where hot houses are overmuch used, but I intend not to speak of them otherwise, but to advertise those that tender their own health, which any and circumspect in resorting unto them, cause, and immediately after of with such persons be unclean.

It is not good to Bath, the moon being in **Same** signes, as in Taurus, Virgo, or Capricornus, the stars, because they are of a cold nature; and the nature cold, is to restrain and bind: and so the Moon being in these signes, the pores of the body are closed and shut: So there can be no resolution of humours and superfluities, which by bathing ought to be avoided.

But in fiery signes, when the moon is in Aries, Leo, or Sagitarius, then it is a good time for bathing, for then the body is apt to resolution: for it is the nature of heat, to open and resolve.

It is best bathing two or three daies after the change, and at the full of the moon, for then the superfluities are ripe and ready to be avoided, and disposed to flow and issue out, which indeed is the true use of bathing.

If any will enter the Bath for cleannesse sake, let the moon be in Libra or Pisces.

Furthermore if bathing be used for health, let the party grieued learne of the wise Physitian, whether his sickness had need of moistning or drying; for if it require moistning, as in Pchisis, and such like, then let him bath in watry signes, having good aspect with Iupiter or Venus, But if the sickness require drying, as in Paralysis, and the like, then let him bath, the Moon being in fiery signes, having good aspects with Mars and the Sun.

Also before you enter into any bath, your body must be first prepared and purged, for if you go in unprepared, peradventure you may be worse than before.

The best time of the year to bath is in the Spring, and in Harver, & in the months of May and September.

The

A Prognostication.

The best time of the day to go into the bath is one hour after the sun rising at the least, alwaies provided, that you walk either an hour, or half an hour before, and have a stool either by nature or art: you must cover your head well, so long as you be in the bath, and beware you drinke not cold drinke, although you be very thirsty, but forbear all things that be cold, lest by you are hot within, cold strike suddenly into a principall member and hurt you.

The time of tarrying in the bath is commonly one hour, but it may be more or lesse, according to the nature of the bath, or sickness of the party, at the discretion of the wise Physician.

For purging.

In purging these five things ought to be known.	}	<ol style="list-style-type: none"> 1 } The humour which aboundeth. 2 } The best way to avoid it. 3 } The strength of the person. 4 } The manner of the sickness. 5 } The force & nature of the medicine.
---	---	---

For when these things are not considered and observed, many perillous accidents may follow, and greatly hurt the body.

Good signes generally for purging, are Cancer, Scorpio, and Pisces, particularly with potions or drinks, the Moon being in Scorpio.

Purge with Electuaries, the Moon being in Cancer, purge with Pills the moon being in Pisces.

Take preparatives, the moon being in Gemini, Libra, or Aquarius.

Take vomits, the moon being in Aries, Cancer, or Capricornus.

Take Clusters, the moon being in Libra or Scorpio.

To provoke Sweatings, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Attractive, the moon being in Aries, Leo, or Sagittarius.

Good to comfort the vertue Digestive: the moon being in Gemini, Libra, or Aquarius.

Good

Good to comfort the vertue retentive, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Expulsive, the moon being in Cancer, Scorpio, or Pisces.

For using of Unguents, or plasters, they are best to be applied and used, when the moon is in that member or signe which governeth that part of the body, to which it is applyable.

For sweatings.

Sweatings as they are of two sorts, that is to say, naturall and artificiall, so they are used for two ends and purposes: the Naturall sweat, if good heed be taken in opening of the pores, will dissolve grosse and thick humours, will cleanse the blood, will comfort the spirits, will put away cold, will consume raw humours, qualifie and quench raging fevers, will help numbnesse, and the droopie.

The Artificiall sweat will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolve congealed and cold humours, and melancholly blood.

But for the better performing and effectuall working of these causes, the Counsell of the learned Physician is to be desired and used.

The best or meetest signes to sweat in, are Aries, Leo, and Sagittarius, and that two or three daies after the Change, and at the full moon.

And note that sweating is better to be done, in the evening then in the morning: for when the body hath nourishment within, the spirits shall not so easily be drawn forth to the extreame parts.

Note further, that lean folks, and dry or feeble persons, must sweat little, for it will hurt them much: but fat folks, may sweat well, and it will do them much good.

A Prognostication.

A brief Description of the four Quarters of
this present year of our Lord God. 1658.

Of Winter.

Winter which is the chiefeſt for to the Spring, (the diſgrace of Summer, and the deep devourer of the fruitfull harveſt) began to take his effects, according to our uſuall computation, on the 11. of December in the year afore-going, at the entrance of the Sun, into the firſt minute of the ſigne Capricornus, at which time the Sun ſhall be at his greateſt South declination, from the Equinoctiall line, ſo that he riſeth South-Eaſt, and ſetteth South-Weſt.

Now is the Hyea al or winter ſolſtice, for the Sun is ſo far removed from our Zenith or verticall point, that he cannot decline any further, & ſtanderth at a ſtop or ſtay, and then is the ſhortheſt day and longeſt night in the year, and ſo this Quarter doth continue untill the 10 of March next following.

This ſeaſon is by nature cold and moiſt, unpleaſant for the moſt part to travellers either by Sea or Land, and unto aged perſons it is very combrous and noyſome, cauſing ſuperfluitie of rawneſſe, and abundance of cold moiſtneſſe to over-flow their bodies, to their great troubles and diſquietneſſe.

The diſeaſes and ſickneſſes, moſt like to afflict mens bodies this quarter, will be Rhumes, Coughs, Hoſes, quotidian Fevers, Gouts, Palfies, Flure Cramps, Conuulſions Epiliſies, Appoplexes, Collicks, raw undigeſted Humours, Hoarſeneſſe and many cold Diſtillations, into ſeveral parts of the body.

Thus will the ſtarrs if God aſſent,
Whoſe power alone can all prevent.

NEVE. 1658.

Of the Spring.

The Sun (which is the eye of the world, the fountain of light, and the chiefe moderator of all the rest of the lights) hath like a Gyant run his race, and finished his revolution (Gradatim) throughout the 12 signes, and now this 10 of March beginneth his journey afresh again, and goeth an even course, and so becomes an indifferent Arbitrer, between the day and night, and maketh an Equality throughout his whole government, to the great joy and comfort of all his revived Subjects, chearing with his splendid countenance, the poor weather-worn weeds of this our dark starre of mortality (which the darkned Countenance of winters extremity, had almost subdued) with his excellent presence, whereat the earth begins to smile, and to put on her new apparell, the flourishing Libery of fresh Flora.

This season is by nature hot & moist, the most temperate time of the year, and the least breeder of sickness that both procure death; and a very convenient time for the removing of sickness and gristles gotten before, and also to avoid and prevent those that are to come: for now the vital senses and spirits of man and other creatures are quickned and revived, and therefore the humours which do abound, and are readiest to oppress nature, are fit to be emptied and avoided whether by blood-letting, purging, or otherwise, as the learned Physician shall advise, and as the cause of the disease shall require: such therefore as be diseased, let them not neglect this time.

Sundry sorts of Sickneses, and infirmities are subject to this quarter, as Tertians, and unconstant Fevers, obstructions in severall parts, Jaundies, Swellings, hot Impostumes, Squinnancies, bleeding at the Nose, with Pusshes, Boyles, small Pox, Letters palne in the head and eyes, Melens, Kings-evil, Pe-silent Fevers, and many other diseases which may proceed of the corruption of the blood.

Infections from the starrs may fall,
But one above doth stay them all.

Of

A Prognostication.

Of Summer.

Summer the third part of our vulgar year, according to our usuall computation: Now when the Sun hath fully determined the Spring, with his last Grade of Gemini, and moved in his motion, to the highest point of his course, namely to the first entrance of Cancer, which shall be this year the 11. of June. Now is the second solstice of the year, called the festiual of Summer solstice: for even as the Sun, when he entereth Capricornus, hath his greatest South declination, from the Equinoctiall: So now at his ingresse into the beginning of Cancer, he hath his greatest declination toward the North from the said Equinoctiall line: and even as at that time of the winter Solstice, he was so far removed from our verticall point, that he could move no further towards the South, and was therefore to approach again towards our North latitude, at which time he seemeth to stand: So now being come so near to our Zenith that he cannot remove no further towards the North, and is therefore to revert again to the South Latitude. At the first going from us he seemeth also to stand, insonmuch that even as before at his return toward us again, he made with us the shortest day and longest night in the year: So now at his return from us, he maketh with us contrariwise, the longest day and shortest night in the year: afterwards declineth more and more from us, like as before he moved more and more towards us.

This season according to his proper nature, is hot and dry turning the humours of mens bodies, into hotness and dryness, resembling the element of fire, and complexion of Choler, bringing all fruits to their ripeness, cattle to their fatness, and men to their wealth.

The infirmities likely to molest and trouble us this quarter are according to the judgements of Hippocrates and other learned writers of Physicke, are hot burning Fevers, Phrenzies, Inflammations, Plurisies

risies, impostumes of the lungs, Harpnesse of Arteries
Stranguy, Alteration of the blood, spotted Fevers,
pestilenc Fevers, heat of bloud, and choller.

Though Starrs incline to work us ill,
All shall be as the Maker will.

Of Autumne.

Autumne, according to our accustomed computation,
the last quarter of the year beginneth at the Sunns
departure, from the last scruple of Virgo, into the
first entrance of the second Equinoctiall signe Libra,
the which will be this year, on the 13. day of September,
the day and night being of an equall length, as in
the tyung: at which time is the Autumnall Equi-
noctiall, for even at the Sunns entrance into Aries, the
day increasing from the Winter Solstice, till then
came to be equall with the night, going on still more
and more till the Summer Solstice, when was the
longest day and shortest night: So now the night by
encreasing from the Equall Solstice, to the Sunnes
ingredience into Libra, hath got to be equall with the
day, and shall encrease more and more, till the Bru-
mall Solstice come againe, when the night is longest,
and the day shortest.

This time of the yeare is of it selfe unconstant, and
variable, warme in the day time, and cold in the night.

This quarter because of the inequality of tempe-
rature, may as Hippocrates saith, be called the mother or
nurse of deadly sicknesses.

And also Galen saith, that this time of the yeare, is
very dangerous for taking sicknesses.

The bodily sicknesses and diseases, commonly atten-
ding this time of the yeare, are many as the Stone,
pains in the Back and Reines with stopping, and
surpessing of Urine, much Joynt aches, Sciaticas,
and Gouts, Many quarrein Fevers, vertigoes, Ap-
oplexies, Palsies, Lethargies, Convulsions, Cramp
He.

A Prognostication.

Hemorrhoids, Fistulaes, tenesmus, dysenteria, and Fluxes, Melancholly distraction, and Madnesse, Minde-nesse and obstruction of the Spleen, and such diseases as may proceed of grosse phlegme, and Melancholly.

Thus every Planet in his kinde,
Is to performe the Almightyes minde.

A Declaration of the inclination, and disposition of the Winds and weather, according to the severall motions, configurations, and influences of the erraticall and fixed starrs: with the day, houre and minute of the change of the Moone, her full, and quarters: And also the rising and setting of the Sunne in every seventh day of every moneth of this present yeare of our Lord God 1658.

Of Ianuary.

Day.	The sun riseth.	The sun setteth.
1.	houre. 8. and 3. min.	houre 3. and 57. min
7.	houre. 7. and 56. min.	houre 4. and 4. min.
14.	houre. 7. and 46. min.	houre 4. and 14. min.
21.	houre. 7. and 34. min.	houre 4. and 26. min.
28.	houre. 7. and 23. min.	houre 4. and 37. min.

First quarter the 1. day 6 min. after 1. of the clock in the afternoon, windy or frosty.

Full moone the 9. day about 11. of the clock in the forenoon, winterly weather.

Last quarter the 16 day neere about 6. of the clock in the forenoone, windy and apt to moysture.

New Moon the 23. day 59. min. after 10 of the clock in the forenoone, frosty and cold.

First quarter the 31 day. 50 min. after 10. of the clock in the forenoone, cloudy and unconstant;

Ianuaries Abstract.

In this moneth let not blood, neither use but little physick, except great necessity constraines thee, and beware of taking cold, for this moneth Rheums and Fleame, doe much increase: to fast long is hurtfull, but to drinke white-wine fasting is good and whole-
some

NEVE. 1658.

some, use meates that are naturally hot moderately, and wear warme cloathes.

In worldly business, this moneth you may set all kind of common fruits trees, plants, as peares, plums, Albert, walnut, and such like, hawthorne, and all sorts of quinces, or plants, are fittest to be generally sett, from the change to the first quarter.

Take away mosse and superfluous branches from your trees, and this moneth is good to set beanes, peas, parselmips, leeks, radish, garlike, turnips, and onions, if the weather prove mild, and the moone past the full, you may begin to graft at the end of this moneth, so as the moone be increasing in her light.

Good husbands as to this moneth crop trees, fell timber, and geld cattell, such as are to be gelded, the state of the moone alwaies considered.

Of February.

Day. The sun riseth.

The sun setteth:

1.	houre 7. and 13. min.	houre 4. and 47. min.
7.	houre 7. and 4. min.	houre 4. and 56. min.
14.	houre 6. and 50. min.	houre 5. and 10. min.
21.	houre 6. and 34. min.	houre 5. and 26. min.
28.	houre 6. and 22. min.	houre 5. and 38. min.

Full Moone the 7. day neere or towards midnight, frosty and cold.

Last quarter the 15. day 48. min. before 1. of the clock in the morning, fitting the season.

New moon the 22. day 27. min. after 2. of the clock in the morning, some raine or snow.

Februaries Abstract:

In this moneth all slimy fish, Milk and Rice, and such like, that doe oppilate and stop the Liver and veines, or thicken the blood, are to be eschewed as enemies to health, and also yet forbear Physick, and letting of blood, except necessity do urge, and learned Counsell do advise you; beware now of taking Cold, for now are Agues apt to be taken, and it is very ill to take heates and afterwards sudden cold upon them.

Now is the most apt time to graft a plant, and to set all kind of trees and bushes, the wind and weather, & age of the Moone considered, Pease, Beanes, Parsenips,

A Prognostication.

Parſenips, and ſuch like, as in January, may very well be ſet in the wane of the Moone.

The time is now to trim up Gardens, to ſet and ſow all kind of Kitchen Herbs, to ſet ſlips, ſow kernels, muſtard ſeeds, oats, ſet hops, cut vines, and proyn them, ſtick up your Rouncball Heale and Haſtings.

Of March.

Day.	Sun riſeth.	Sun ſetteth.
1.	houre 6. and 20. min.	houre 5. and 40. min.
7.	houre 6. and 8. min.	houre 5. and 52. min.
14.	houre 5. and 4. min.	houre 6. and 56. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 22. min.	houre 6. and 38. min.

First quarter the 2 day 41. min. after 6 of the clock in the morning, answerable to the season.

Full moon the 9. day 49. min. after 10. of the clocke in the forenoone, reasonable temperate.

Last quarter the 16. day 5. min. after 2. of the clock in the morning, stormy and unconstant.

New Moon the 23 day neere about 7. of the clocke at night winterly weather.

First quartet the 31 day 28. min. after 10. of the clocke at night, ſnow or rayne.

Marches Abstract.

In this Moneth the humours of Mans body begins to increase, and now grow feeding breedeth groſſe blood and groſſe humours, and therefore uſe meates of good digestion, & ſuch as breed good juſce: it is a good time to purge and clarifie the blood by potions, bathing, and bloodletting, or ſuch other waies as the learned Phyſitian ſhall approve: and as the cauſe of the diſeaſe ſhall require: Alſo in this moneth ſweetmeates and drinks are commendable.

The time of grafting as yet endureth, together with ſowing, ſowing, proyning, plaſting of Vines, and Hoppes, willow, oats, pease, onyons, parſnips, and ſuch like.

Of Aprill.

Day.	The ſun riſeth.	The ſun ſetteth.
1.	houre 5. and 18 min.	houre 6. and 42. min.
7.	houre 5. and 6. min.	houre 6. and 54. min.
14.	houre 4. and 54. min.	houre 7. and 6. min.
21.	houre 4. and 39. min.	houre 7. and 21. min.
28.	houre 4. and 29. min.	houre 7. and 31. min.

NEVE. 1658.

Full Moone the 7 day 10. min. after 7. of the clock at night faire and temperate.

Last quarter the 14. day 5 min. after high noone, apt for the season.

New moone the 22. day 12. min. after 11. of the clock in the forenoon, somewhat cloudy.

First quart the 30. day, 52. min. after 10. of the clocke in the forenoon, suitable to the season.

Aprils Abstract.

In this moneth of April, the pores of mans body are opened, and apt to receive Physick, and they that refuse the same, I commit them to the benefit of nature. for of all times of the yeare, this is the best time to prevent causes of sickness, or for speedy remedy in extremities, for now nature doth renew strength through all the body: so where sickness layeth the soone unburdeneth by means of Physick, wherefore what it cannot doe now, will hardly be done hereafter, therefore take time while time is, &c.

As yet you may graft and proyne vines, and also set melons, citrons, cucumbers, artichokes, and pole-hops. Sow barley, Tanners apply themselves to barking of trees.

Of May.

Day. The sun riseth.

The sun setteth.

1.	houre. 4. and 23. min.	houre 7. and 37. min.
7.	houre. 4. and 15. min.	houre 7. and 45. min.
14.	houre 4. and 5. min.	houre 7. and 55. min.
21.	houre 3. and 56. min.	houre 8. and 4. min.
28.	houre 3. and 50. min.	houre 8. and 10. min.

Full Moone the 7 day, 52 min. after 2 of the clocke in the morning, somewhat moist weather.

Last quarter the 13 day, 49. min. after 11 of the clock at night, faire and pleasant.

New moone the 22. day, 2. min. after 3. of the clock in the morning, fitting the season.

First quarter the 29 day 24. min. after 7. of the clocke at night, windy and cloudy.

Mayes Abstract.

In this moneth rise early, for May doth not love any sluggards, and let such as bee in health and able walke into the fields, and eate and drinke betimes for it is good and wholesome, abstaine from all meates that be of a hot nature.

A Prognostication.

And such as be sick. It is a very good time of the yeare to leech blood, & to take Physick: such as bee whole, God keep them in health, and such as bee sick, God send them good Physicians and Physick.

The time is now fitting to sow Bazill, Marjerom and such fine seedes as before might not be sowne, because of the coldness of the weather. Set Sage according to the proverbe, set sage in May and it will last alway, sow flax and hemp, set Artichokes, weede your Hops, and Gardens to your grafts that no superfluous branches trouble them. May helw, Rosemary flowers, and beane flowers, may to your pleasure be distilled this moneth, and now also have care of watching your bees.

Of June.

Day.	The sun riseth.	The sun setteth.
1.	houre 3. and 49 min.	houre 8. and 11. min.
7.	houre 3. and 46 min.	houre 8. and 14. min.
14.	houre 3. and 47 min.	houre 8. and 13. min.
21.	houre 3. and 49 min.	houre 8. and 11. min.
28.	houre 3. and 52 min.	houre 8. and 8. min.

Full Moone the 5. day, 23. min. after 10. of the clock in the forenoone, pleasant weather.

Last quarter the 12. day, 33. min. after 1. of the clock in the afternoone, overcasting clouds for raine.

New moon the 20. day 24. min. after 5. of the clock in the afternoone, wet and unconstant.

First quarter the 28 day, 36. min. after 1. of the clock in the morning, faire weather.

Iunes Abstract.

In this moneth, if thou must needs use Physick, take early in the morning, that it may have brought to the heart of the day, and use a light and thin dyet, for the stomack is not able to digest as in winter, & in some of the former moneths, and it is very good and convenient to come to drinke clarified whey, dayled with cold beards, and to abstaine from violent exercise.

Distilling of roies, making of syrups and conserues, now in prime, now gather such herbs as you meane to keepe all the yeare, but be sure you dry them in the shade. Good husbands and huswives are now weeding their corn and gardens, & others sheering their sheepe, the time now to set rosemary, & gillyflowers, take heed of cutting the

NEVE. 1658.

cuttes of herbes with knife, but rather gather them with your fingers, now you may set saffron, carry out camphor, make hay, rid gardens of snayles, ants, of pismires, &c.

Of July.

Day.	The sun riseth.	The sun setteth.
1.	houre 3. and 54. min.	houre 8. and 6. min.
7.	houre 3. and 59. min.	houre 8. and 1. min.
14.	houre 4. and 7. min.	houre 8. and 58. min.
21.	houre 4. and 20. min.	houre 7. and 40. min.
28.	houre 4. and 30. min.	houre 7. and 30. min.
Full moone the 4. day 35. min. after 6. of the clock in the afternoon, apt for the time.		
Last quarter the 12. day 44. min. after 5 of the clock in the morning, hot pleasant weather.		
New moon the 20. day about 6. of the clock in the morning, hot weather.		
First quarter the 27. day, 5. min. after 7. of the clock in the morning, some raine.		

Julies Abstract.

In this moneth use cold hearbs & meates, abstaine from physick, and now the rivers are more wholsome then the baths, let the sun be up before you walke abroad, in the time of any pestilence of plague, keepe your chamber windowes shut opening them when the sun hath force of shining, and be sure to perfume your chambers every morning with tarr upon a chaffingdish of coales, then which nothing is better, and use Cardus Benedictus, boyled and drinke fasting.

Day habest now calles slack husbands to worke, and such as have leasure, it is good to fallow for wheat, & to carry out soyle, & to gather seedes & flowers to keepe all the yeare, and to dry them in the shade, till they be almost dry, and then set them a while in the sun. & in like manner you may use your hearbs.

Of August.

Day.	The sun riseth.	The sun setteth.
1.	houre 4. and 36. min.	houre 7. and 24. min.
7.	houre 4. and 48. min.	houre 7. and 12. min.
14.	houre 5. and 0. min.	houre 7. and 0. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 27. min.	houre 6. and 33. min.
Full moone the 3. day 19. min. after 4 of the clock in the morning, faire weather.		
Last quarter the 10. day 45. min. after 11. of the clocke at night, some hot cloudy.		

New

A Prognostication.

New Moone the 18. day about 5. of the clock in the after-
noone, some heate drops.

Augusts Abstract.

First quarter the 18. day, 32. min. after high noon, sultry
weather.

Augusts Abstract.

In August, moderate dyet is good Physick, for now it
is dangerous to surfit, and take heede of heates and then
of colds, for nothing sooner ingendereth Plurisies, and use
not to sleep much, especially in the afternoone, for making
applactions and for avoiding of Agues and head-ach & Ca-
tharrs, and now let a man abstaine from physick except ne-
cessity doe compell,

Now Lady Ceres looks to have men enough to attend
her, they that would have good seedes for their gardens the
next yeere, must now gather of their owne, least in buying
they lose their labour and their money, and such as desire
to have lettuce, or other hearbs for winter, may sow seedes
in the increase of the moone.

Of September.

Day.	The sun riseth.	The sun setteth.
1.	houre 5. and 34. min.	houre 6. and 26. min.
7.	houre 5. and 46. min.	houre 6. and 14. min.
14.	houre 6. and 2. min.	houre 5. and 58. min.
21.	houre 6. and 14. min.	houre 5. and 46. min.
28.	houre 6. and 28. min.	houre 5. and 32. min.

Full moone the 1. day, 12 min after 4. of the clock in the after-
noone, inclined to moysture.

Last quarter the 9. day, 19. min. after 6. of the clock at
night, temperate and seasonab'e.

New Moone the 17. day 9. min. after 3. of the clock in
the morning, apt for the time.

First quarter the 23. day, 35. after 7. of the clock at night,
somewhat cloudy.

Septembers Abstract.

In this moneth such as have need, may safely take physick,
also may bath and bleede, in this moneth all things arrive
their proper nature and vertue, and such fruits as are ripe
and not infected, are good to eat for such as have good stom-
acks: Time is good to make conserve of Barbaries, and
Quinces, winter hearbs may now be sowne, likewise is the
time to set Artichokes, Rose trees, Aple trees, Wardens,
strawberries, violets, gilliflowers; Apples are to beget
(the)

NEVE. 1658.

thered in the full of the moone, sow Barlenips, and in dry weather gather your Hops; Good husbandry is sowing Rye and Wheate, good huswifery is making of Cierjnee, and plucking of Henspe.

Of October:

Day. The sun riseth.

The sun setteth.

1.	houre 6. and 34. min.	houre 5. and 26. min.
7.	houre 6. and 46. min.	houre 5. and 14. min.
14.	houre 7. and 0. min.	houre 5. and 0. min.
21.	houre 7. and 15. min.	houre 4. and 45. min.
28.	houre 7. and 26. min.	houre 4. and 34. min.

Full moone the 1. day 36 min. after 6. of the clock in the morning, windy and unconstant.

Last quarter the 9. day 29. minuts after high noone, inclined to raine.

New Moone the 16. day 4. min. after 1. of the clock in the afternoone, unconstant and uncertaine.

First quarter the 23. day, about 5. of the clock in the morning, temperate and faire.

Full moone the 31. day, neere about 1. of the clocke in the morning, cloudy and close weather.

Octobers Abstract

In this moneth thou mayest take Physicke and also hath if occasion serve, use hot meates and drinckes, and use good wholsome wines to nourish good blood, and beware of taking cold, because the quartaine Ague will be apt to be taken, and such other dangerous and ill diseases.

Remove young trees, as apples, pears, plumbs, quinces, roses, &c. set pease, parsnips, &c. good husbands neede not be hasted to sowing of wheat, set nuts, acorns, and filbirds. and doing of such good husbandry.

Of November.

Day. The sun riseth.

The sun setteth.

1.	houre 7. and 33. min.	houre 4. and 27. min.
7.	houre 7. and 42. min.	houre 4. and 18. min.
14.	houre 7. and 52. min.	houre 4. and 8. min.
21.	houre 8. and 3. min.	houre 3. and 57. min.
28.	houre 8. and 9. min.	houre 3. and 51. min.

Last quarter the 8. day about 4. of the clock in the morning, answerable to the season.

New moon the 14. day, 14. min. after 11. of clocke at night, raynie weather.

First quarter the 21. day, 49. min. after 5. of the clocke at night, reasonable faire.

Ful

A Prognostication.

Full moone the 29. day, 32. min. after 8. of the clock
night, temperate and faire.

Novembers Abstract.

In November finish the physick you meane to take, & so
till March, except some great necessity doe constrain you
Use good meate, and hol some wine to nourish thy blood
Wear thee warme cloathing and goe dry of thy feet, & be
sure to be troubled with Rheume and Mose, besides
other inconvenience that will ensue. Beware of the
house this moneth, and use Betony and Cinamon in drink.

In the new of the Moone, you may remove young trees
as in the last moneth, and set Crabtree stockes to graffe
when you please, it is good time in the wane of the moone
to set pease, and beanes, and if the weather be not hard,
good sowing of Parsenips, good making of malt, and
ling of Beebes of swine.

Of December.

Day.	The sun riseth.	The sun setteth.
1.	houre 8. and 12. min.	houre 3. and 48. min.
7.	houre 8. and 14. min.	houre 3. and 46. min.
14.	houre 8. and 15. min.	houre 3. and 45. min.
21.	houre 8. and 12. min.	houre 3. and 48. min.
28.	houre 8. and 7. min.	houre 3. and 59. min.

Last quarter the 7. day 30. min. after 5. of the clock
night, cloudy and cold.

New Moone the 14. day 53. min. after 9. of the clock
the forenoone, frosty and windy.

First Quarter the 21. day, 14. min. after 10. of the clock
the forenoone, some frost and cold.

Full Moone the 29. day 47. min. after 3. of the clock
the afternoone, some snow or rayne.

Decembers Abstract.

In this moneth of December, keepe thy body and head
cold, and eat such meates as be of a hot quality, abstaine
from Physick, & let thy kitchen be thy Apothecary, wear
cloathing thy nurse, merrey company thy keeper and good
pity thy exercise.

Remove trees and bushes, if the weather prove not
extreme, in the wane of the moone, set beanes, pease,
those hearbs that cannot endure the cold, cover them
draw from the frost and snow.

Soli Sapienti Deo Sola Gloria:

FINIS.
